ABOUT ME

I am a lecturer in the Department of Physiology at Habiganj Agricultural University, specializing in the study of biological functions and their significance to health and well-being. With a deep passion for teaching and research, I educate students on both fundamental and advanced physiological concepts, seamlessly integrating theoretical knowledge with practical applications. Beyond teaching, I am actively engaged in scientific research, focusing on animal health and social well-being. My work aims to make meaningful contributions to a variety of fields, including healthcare, veterinary science, environmental health, and animal welfare. Through mentorship and innovative teaching approaches, I strive to inspire and guide the next generation of scientists and professionals, fostering their growth and potential. As a physiologist, my ultimate goal is to enhance lives and advance knowledge, driving positive change in both society and the natural world.
